

MDM 3 series | Medicine Detection Machine

MDM³ series **NEXT GEN**

● Medicine Detection Machine

 The MDM 3 series helps tablet packaging centres to check the content of unit- and multi-dose pouches. Data gathered by the MDM, including details of the pills, patient information and a colour image of each pouch, are stored for security and accountability.

- Accurate checking of up to 75 pouches/minute
- Captures colour image of each pouch for accountability
- Saves detailed information for process control and provides statistics for process overview

Technical specifications:

Power: 220V~50Hz 6A or
110 V~60Hz 12A
Air pressure: 6 Bar
Includes UnWinder unit

Dimensions:

Width: 740 mm
Length: 1700 mm
Height: 1870 mm
Weight: 375 kg
