Medication Detection Machine (MDM) Testimonial

The cMDM, Medication Detection Machine, which I purchased through Manrex, has already proven to be a wonderful addition to our daily pharmacy operation. Manrex has introduced us to a number of medication delivery systems over the years, all of which have had a tremendous effect on medication dispensing accuracy and patient safety. Any time I have the opportunity to streamline and improve our processes you can be certain it will be done.

I have to admit, when I was first looking at MDM technology; I was certain it would help improve efficiencies within my pharmacy, but what I didn't realize was how well it would be received by the facilities I service.

I am extremely happy to report that with the cMDM, not only has my customer base grown, more importantly my technicians and pharmacists spend more time doing what they like to do, taking care of our customers.

I am thankful that we were able to be a leader for this technology in Canada.

Sincerely,
Nathan Hill
