Manrex Long Term Care Medication Cart

I must submit my most positive opinion and comments regarding the new medication cart that we have recently purchased from Manrex.

Due to difficulties with shoulder problems caused by the height of most medication carts, we requested a trial experience with a medication cart that was suited for our nurses. Manrex was most accommodating with this arrangement. We were able to have a reasonable length of trial period to ensure that we were making the right decision. Of course, the trial period extended a little longer than anticipated but the Manrex representative was most understanding and patient. I must commend Ben for the obliging service provided to us.

The cart that we did purchase is very suited to the needs of our nurses. Medication administration is a major time consuming duty for nurses in Long Term Care. The height of the cart is so important for this repetitive task. We are very assured that this cart will provide for more comfort for the nurses and will improve their quality of care. Thank you to Manrex.
