Manrex Ltd. and Kirby Lester announce the pharmacy industry's first and only compact, fully-automated dispensing system

**July 27, 2009**

Manrex Ltd. and Kirby Lester today announced the pharmacy industry's first and only compact, fully-automated dispensing system. The new KL60 handles all the functionality of a super-sized robotic dispenser, but in less space and at a fraction of the cost.

The KL60 is produced by automation specialists Kirby Lester, based in Lake Forest, IL. The product is exclusively distributed and supported within Canada by Manrex Ltd, Canada's leader in medication delivery systems, based in Winnipeg, MB.

The KL60 will make automated prescription dispensing possible for retail and outpatient pharmacies that previously could not generate sufficient volume to support a robotic dispenser. The machine is ideal for pharmacies that supply 100 to 1000 prescriptions daily.

The new Kirby Lester system is also small enough to fit into virtually any pharmacy.

With compact sizing at only 29" wide, 46" long and 78" high, the KL60 is only one-third to one-half the size of traditional robotic dispensing technology.

"The KL60 is such a big deal precisely because it's not big at all," says Christopher Thomsen, Kirby Lester's Vice President, Business Development. "Kirby Lester has figured out what the automation industry has been lacking for a decade. Sixty truly is a magic number for most mid- to high-volume retail pharmacies. By automating 60 medications - and not 150 or 200 - the KL60 makes full automation viable and economical for many more pharmacies.

"Kirby Lester has truly answered the call" states Ben Szuuts, Sales Manager for Manrex Limited. "The new KL60 opens the automation door to pharmacies of all sizes from coast to coast. Space and budget have always been the two main constraints for pharmacies sitting on the edge of automation, not to mention service. Enter Kirby Lester, a truly smart, affordable solution with a touch of superior Manrex Customer service to back it up. Saving Lives, Saving Time, Saving Money."
