

Manrex makes donation

Manrex makes donation

Manrex is very committed to putting back into the community and we try to help a variety of organizations throughout the country and our city. As always, Manrex is focused on improving the health of Canadians. We provide products focused on medication error prevention, but our commitment also touches on a wide range of health initiatives. One area of concern across Canada is the rise in both obesity and diabetes. To help the many organizations that are addressing these health conditions, Manrex has provided the Diet Plate: a unique portion control device to help reduce the calories people consume. We are thrilled to have made these donations to the following groups:

[Child Nutrition Council of Manitoba](#)

[Halton Diabetes Program \(Oakville Hospital\)](#)

[Siloam Mission, Winnipeg, Manitoba](#)
